

I feel it is crucial that we all calm down and not get ahead of ourselves. My understanding is that we are NOT voting right away to AKC Register the LUA dogs. We are ONLY voting to go the next step and simply discuss the possibility. I am a first generation American and one of the best things about living here is freedom of speech. Besides that, whether you are for or against registering the LUA dogs how can a reasonable, fair, intelligent human being make any kind off decision without listening to both sides. In my opinion, an intelligent, educated human being should always be open to discussion.

We all can agree we love Dalmatians, so that is a given. What harm could possibly come of just openly and in detail discuss the pros and cons of something that is a serious, painful, expensive and too frequent disease in our beloved Dalmatians. You still have an opportunity to disagree after all is said and done. Do it for the Dals.
